EXHIBITION
FEBRUARY 6-8

PARTICIPATE IN THE STUDIES 2020 EXHIBITION AND MEET YOUR FUTURE STUDENTS AND EMPLOYEES!

How do you make sure you are needed in the future? How do you choose an occupation that you never have to regret? These are questions asked by many young people at the crossroads of their future path.

You are invited to participate at the 18th International Exhibition of Knowledge, Education and Career Planning, STUDIES 2020, and help young people find answers to these burning questions.

STUDIES 2020 is the largest study and career planning exhibition in Lithuania and the Baltic states. The exhibition gathers under one roof a huge selection of learning services as well as additional possibilities:

- Lithuanian university, non-university, and vocational higher education schools,
- educational and expert organisations,
- foreign universities,
- businesses, non-formal education, career consultations,
- language courses
- international examinations and other alternatives, such as travelling, volunteering and gap year.

THE INTERNET WON'T CHOOSE ONE'S STUDY PROGRAMME

The exhibition is attractive in its format and concentrated content. Young people are invited to search for relevant information through direct interaction at the exhibitors' stands as well as at lectures, non-formal meetings with representatives of educational and business institutions, career consultants, and members of pupil and student organisations. The exhibition encourages one to come, be engaged, ask questions, communicate, compare, draw conclusions and make a choice.

THE EXHIBITION'S THEMATIC HALLS

Every year, the STUDIES exhibition reinvents itself, adding relevant topics and expositions presenting said topics as well as new events that take place in all the LITEXPO conference halls and the additional event spaces: UNIQUE ME, consulting space KNOW YOURSELF, STEAM SPACE, the Teachers' Room, Lifelong Learning Space, etc.

STUDIES 2020 will occupy four exhibition halls:

Hall 5

Higher university and college education in Lithuania, educational organisations, STEAM space, career consulting space KNOW YOURSELF.

Hall 4

Career planning fair CHOOSING A PROFESSION: presentation of the market's most relevant professions, vocational training and education, presentation of civil services, the National Defence Volunteer Forces, and professional excellence competitions.

Hall 3

International study programmes, language courses, international examinations, business proposals for traineeships and additional jobs for spare time. **New: gap year proposals.**

NEW

Hall 1

Lifelong learning.

THE INTERNET WON'T HELP FIND YOURSELF

The new topic, 'Lifelong Learning', was dictated by the need to talk about what competences and knowledge are needed right now as the labour market is facing a shortage of qualified professionals and more and more people are choosing jobs that bring them joy and become a hobby.

We invite businesses and educational organisations to speak on the perspectives that open up for those that are able to change, create, quickly master and apply new technologies and that are ready to unlock their potential in both their professional and personal development.

PRICING FOR PARTICIPATION AT THE EXHIBITION:

Application registration / subexhibitor fee
