

BALTTECHNIKA 2022

THEMATIC GROUPS

1. Air pollution and treatment
2. Water pollution and treatment
3. Soil pollution and treatment
4. Noise protection
5. Waste recycling
6. Measuring and control technology for environment protection
7. Other measures of environment protection
8. Energy technologies
9. Nuclear energy
10. Energy saving
11. Electrical engineering
12. Electronics
13. Heating technologies
14. Cooling technologies, aeration and air-conditioning
15. Aeration and Air-conditioning
16. Sanitation
17. Pipework systems
18. Insulation
19. Welding systems
20. Automation
21. Assembly, Handling and industrial robots
22. Industrial equipment and materials
23. Metal processing equipment
24. Surface treatment systems
25. Measurement and laboratory instruments
26. Tools and plant equipment
27. Machinery and equipment for the timber and forestry industry
28. Support industry products and performances
29. Measurement and laboratory instruments
30. Monitoring engineering
31. Control engineering
32. Measuring, regulation and control systems
33. Occupation safety
34. Associations, institutions and organizations
35. Subcontracting
36. Loading technique and services
37. Industrial liquids and chemicals
