

BALTTECHNIKA

May 15-17

The international specialized exhibition of technologies, innovations and engineering solutions BALTECHNIKA 2024 is the only and most important event of the engineering year in Lithuania.

Our mission is to present the country's engineering and technology industry companies, their achievements and potential to specialists and the general public, to encourage the establishment of industrial cooperation relations between business and scientific institutions, traditional innovators, and start-ups.

Emphasis is on the engineering and technology industry, which includes advanced manufacturing solutions, products and innovations. The focus will be on the topics of transport, mobility, renewable resources, sustainability, smart manufacturing solutions such as robotics, digitization, artificial intelligence, etc.

OUR MAIN GOAL

Partner search

Introduction of new products

Sharing innovative solutions

EVENTS

FUTURE ENERGY BALTICS Expo 2024 invites manufacturers, suppliers, distributors, service providers and solution developers of solar energy, traditional energy and building management and engineering systems from the EU and the Baltic States to discuss the latest developments and trends, explore innovations first-hand and meet with potential new customers. It is a separate part of the exhibition, located in hall 4.

During the exhibition, a conference will be held, where the exhibitors will present new products and solutions in the areas such as: solar energy technological innovations, building management technologies, sustainability in industry.

Making Industry 4.0 Real.

The conference is aimed at representatives of engineering and other manufacturing industries, managers of manufacturing, IT and other service companies, professionals, the general public and the academic community interested in digital transformation and examples of its practical application.

The conference is organised by the Engineering and Technology Industries Association of Lithuania LINPRA, the German-Baltic Chamber of Commerce (AHK) and the DigiTech Association INFOBALT.

The Automotive Forum is the first international event in Lithuania dedicated to the automotive sector.

This event will bring together automotive industry professionals and experts who will share their experiences and insights.

During this event, attendees will have the opportunity to learn more about and discuss topics such as Autonomous Driving Technologies, Electric Vehicles, Sustainable and Efficient Transportation, Industry Digitization, and many others.

Participants will also have the chance to visit the exhibition and get a closer look at smart cars, E-drives vehicles Made in Lithuania, robot simulations, and Dakar vehicles.

Companies participating in the event will showcase their activities and products.

The Automotive Forum will not only offer engaging discussions and unique exhibition experiences to better understand industry changes but also B2B sessions, providing opportunities to expand your professional network.

WE INVITE YOU TO BECOME A PART OF THE MOST IMPORTANT ENGINEERING INDUSTRY EVENT IN LITHUANIA
